## Antineoplastic Drug Administration Course (ADAC)

Supporting health professionals to develop the necessary knowledge and clinical skills to administer antineoplastic drugs, and safely handle related waste.

- ADAC uses eviQ content to develop education courses that are based upon the best, and most current and comprehensive, evidence available.
- ADAC was developed by the Cancer Institute NSW and follows a strict governance.
- The course includes high quality, interactive, scenario-based eLearning guides; eQuizzes; supervised clinical practice; competency assessments; and a clinical skills workshop to consolidate theory to practice.

### Who is your ADAC facilitator?

Your ADAC facilitator is an experienced cancer nurse/educator who has been designated by this healthcare facility to deliver the course & support ADAC participants. To access the ADAC modules, please contact your local ADAC facilitator.

### Your ADAC facilitator is:
